

Tokenomics Model for Rise Of Robos

Token Distribution

Token utility

\$RBB can be used to :

- 1- upgrade the Robo vehicle
- 2- rent a robo vehicle, rentals are only possible through the renting contract
- 3- open up tool box
- 4- staking in DEX.
- 5- Governance
- 6- Stake into veRBB to earn share of NFT trading royalty fees.

Total token distribution

Initial token distribution in IDO: 100Million
Max capped at 500Million after 5 years of launch.

	Distribution	Vesting
Private Sale	10%	1 year(3months release)
liquidity	10 %	Locked in Dex
Marketing	5%	
rewards	30%	Monthly release, gaming rewards
Team	20%	2 Years(3 months release)
airdrops	5%	Flexible release

Emission rate

First Year: IDO supply 50Million, monthly emissions 7.5million

Month	Emissions in Month	Total Emitted
1-Jan-2023	7,500,000	57,500,000
1-Feb-2023	7,500,000	65,500,000
1-Mar-2023	7,500,000	72,500,000
1-Apr-2023	7,500,000	80,000,000
1-May-2023	7,500,000	87,500,000
1-Jun-2023	7,500,000	95,000,000

Stake \$RBB to earn liquid WETH yield

\$RBB distribution is capped, max distribution will be 500 Mill and the max supply is attained after 5 years.

By Staking \$RBB, and locking \$RBB to earn veRBB stakers earn from royalty trades. Stakers earn half of the royalty fee.

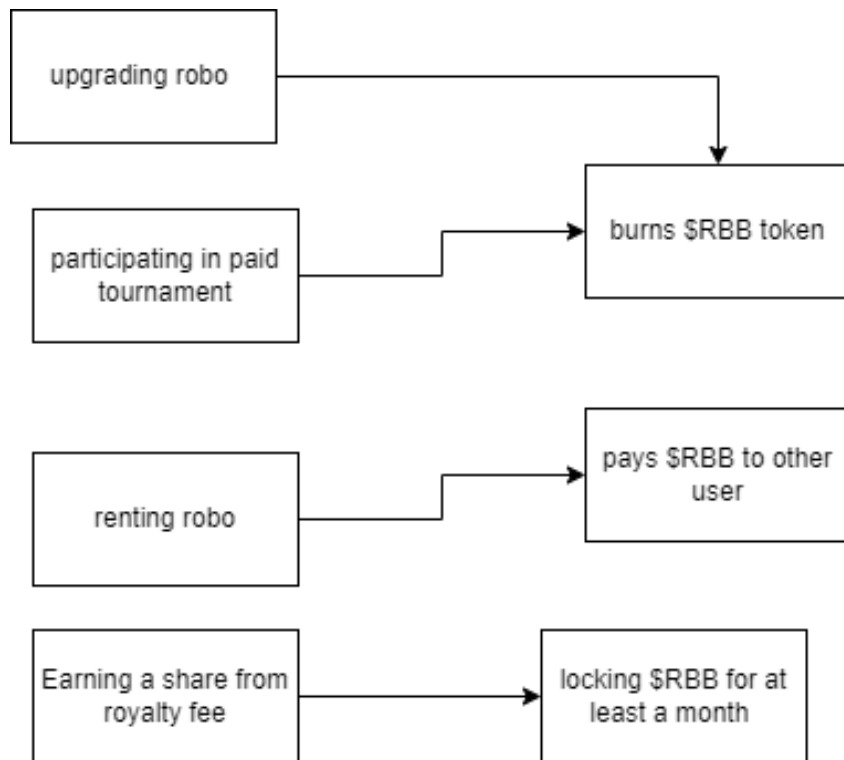

Royalty Fee Total on every NFT trade: 15%

7.5% goes to veRBB stakers.

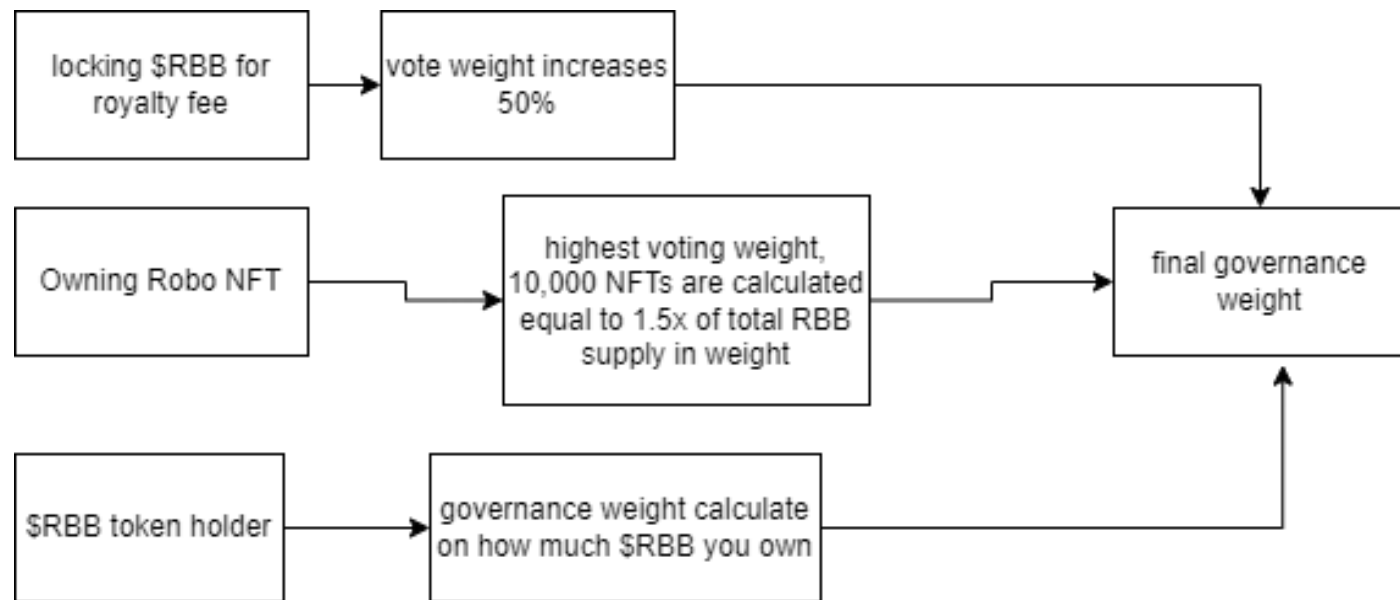

7.5% goes to Contract makers and team.

Staker earn their rewards in the network's native token "wrapped version".

Usage of \$RBB

Brave governance calculation

Governance

NFT DAO

Robo NFT max supply voting is equal to 1.5x of the \$RBB token's total voting, NFT owners hold higher weight in voting for the game DAO.

Governance platform :
Snapshot

Governance progress

Governance is done using Snapshot, Proposal are done in the game forums, Proposals can also be presented in the game discord.
